## summary

- Over 10 years experience designing, developing, integrating and supporting Information Technology tools and applications
- Extensive knowledge of numerous programming languages, including Perl and PHP
- Learn and apply new technologies quickly. Manage multiple projects simultaneously.
- Experience managing Cisco devices via SNMP. Experience with Cisco IOS and CatOS

## specialties

Perl, PHP, Xen, XenServer, MySQL, PostgreSQL, Microsoft SQL Server, Python, Java, Javascript

## skills

- Perl
- Moose
- KiokuDB
- Template::Toolkit
- HTML::Zoom
- Plack
- Moo
- PHP
- XenServer
- PostgreSQL
- Python
- Java
- jQuery
- exim
- Spamassassin
- HTML
- Facebook::Graph
- nginx
- DBIx::Class
- Catalyst
- HTML::Mason
- Reaction
- Web::Simple
- WWW::Mailchimp
- Geo::Coder::Google
- Xen
- MySQL
- Microsoft SQL Server
- Django
- Javascript
- node.js
- MailScanner
- Dovecot
- Net::Twitter
- rrdtool
- Apache

## experience

### Infinity Interactive

04 / 2011 - Present

*Software Developer*

- software development, system administration, software/database optimization

## Cantella

09 / 2010 - Present

*Software Engineer*

- develop in house applications (PHP/Perl)
- migrate servers from physical hardware/xen to XenServer
- upgrade various server software (dovecot, exim, MailScanner, Spamassassin, Samba, Apache)

## CPAN

05 / 2009 - Present

*Contributor*

- SNMP::Info, SQL::Abstract, DBIx::Class, Catalyst, SQL::Translator, netdisco, Angerwhale, Moose, SNMP::Multi, Moo, Geo::Coder::Google, Web::Simple, HTML::Zoom, WWW::Mailchimp, various MooseX

## Parking Mobility

12 / 2010 - 11 / 2011

*Software Developer*

- develop REST backend for [www.parkingmobility.com](http://www.parkingmobility.com)

## Highwinds

11 / 2009 - 09 / 2010

*Systems Administrator, Core Operations*

- Collect, analyze and display various statistics using rrdtool, DBIx::Class, Catalyst, Moose and MySQL
- Monitor servers with Nagios/Cacti/homegrown monitoring system

## Google

05 / 2010 - 08 / 2010

*Independent Contractor*

- participated in the Google Summer of Code 2010 to rework Catalyst component setup code with Bread::Board, <http://warpedreality.org/gsoc10/>

## Arizona State University

04 / 2004 - 11 / 2009

*Systems Analyst*

- Create/optimize/install/evaluate network monitoring/management/information tools
- Continuous improvements/modifications to various network tools netdisco and SNMP-Info
- Develop/implement strategy for migration to Catalyst and DBIx-Class

## Google

05 / 2009 - 08 / 2009

*Independent Contractor*

- participated in the Google Summer of Code 2009 to rewrite/refactor SQL::Translator, <http://warpedreality.org/gsoc09/>
